Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

The use of the trademarks such as "Teflon", "Peek Optima" and "Kevlar" has been noted in this application. Trademarks should be capitalized wherever they appear and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mahtre et al (5,326,372) in view of Kaster (4,532,659). Mahtre et al discloses a prosthetic heart valve assembly comprising an annular structure that has a pair of bearing block receiving windows defined therein, a pair of bearing blocks, each comprised of pyrolytic carbon and being seated in said windows, a pair of leaflets, comprised of pyrolytic carbon, each said leaflet having a **generally** flat body portion and ear-like projections (Figures 5-8B). However, Mahtre et al does not disclose the annular structure comprising a moldable plastic. Kaster teaches a prosthetic heart valve wherein

the annular portion can comprise plastics propylene or Teflon (col. 4, line 65- col. 5, line 4), which the Applicant discloses as moldable. It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the teaching of an annular portion of a heart valve comprising propylene or Teflon, as taught by Kaster, to a prosthetic heart valve assembly as per Mahtre et al, because the plastic materials are "radiopaque and be lightweight" as taught in Kaster (col. 4, line 65- col. 5, line 4).

Allowable Subject Matter

Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas C. Barrett whose telephone number is (571) 272-4746. The examiner can normally be reached Tuesday-Friday between 9:00 A.M. and 6:00 P.M.
